# **Washington County**

### Hospital Admissions for Washington County Residents in FY 2015

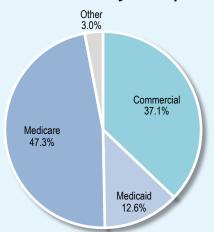

#### Hospital admissions

20,245 Washington County residents (9.7%) were admitted to a PA hospital in FY 2015. Statewide, the percentage was 9.0%.

Some patients were admitted several times during the year, so the total number of hospital admissions for Washington County residents was 29,698.

#### Hospital admissions by anticipated payer

## Statewide, the percentages were:

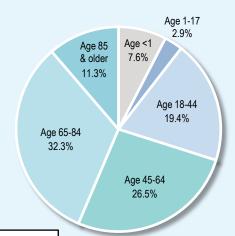

Medicare	44.9%
Medicaid	18.4%
Commercial	33.4%
Other*	3.3%

<sup>\*</sup> Includes other government, self-pay, and unknown payer.

# Where were residents hospitalized? (top 5 by number of admissions)

Hospital Name	Number of Admissions	Percent of Admissions
Washington	10,297	34.7%
Monongahela Valley	3,956	13.3%
St Clair Memorial	2,803	9.4%
Canonsburg	2,308	7.8%
UPMC Presby Shadyside	2,028	6.8%

#### Hospital admissions by age

#### PA Health Care Cost Containment Council

### Statewide, the percentages were:

Age<1	9.0%
1-17	3.6%
18-44	22.0%
45-64	25.5%
65-84	29.4%
85 & older	10.4%

Percentages may not total 100 due to rounding.

#### Hospitalization rates for chronic conditions and county rankings

	Hospitalization Rate <sup>2</sup>		_ County
Condition <sup>1</sup>	State	County	Rank <sup>3</sup>
Diabetes	21.5	20.4	44th
Heart Failure	40.9	56.6	56th
COPD <sup>4</sup> or Asthma (ages 40 or older)	50.2	74.1	53rd
Bacterial Pneumonia	24.9	31.2	38th
Asthma (ages 18 to 39)	6.0	3.3	35th

These conditions were defined using the Prevention Quality Indicators developed by the Agency for Healthcare Research and Quality (www.qualityindicators.ahrq.gov).

#### Medicare payments

One way to examine health care resource use is to look at Medicare spending. The following table shows the average amount Medicare spent per beneficiary in calendar year 2014.

	All Pennsylvania	Washington County
Average Medicare spending per beneficiary for all services	\$9,692	\$9,640
Average Medicare spending per beneficiary for inpatient services	\$3,304	\$3,281

These figures reflect actual (unadjusted) overall spending by the Medicare program for all Medicare fee-for-service beneficiaries regardless of age. "All services" includes hospital admissions, outpatient care, home health, hospice, etc. "Inpatient services" includes hospital admissions to inpatient acute care hospitals paid under the Prospective Payment System, critical access hospitals, inpatient psychiatric facilities, and psychiatric hospitals. In 2014, Washington County had 46,401 Medicare beneficiaries, of which 15,712 were in the fee-for-service program, and 2,972 of these were admitted to the hospital at least once during 2014.

Data source: The Centers for Medicare & Medicaid Services (CMS) Geographic Variation Public Use File (www.cms.gov).

#### **About PHC4**

Created by the PA General Assembly in 1986, the PA Health Care Cost Containment Council (PHC4) is an independent state agency charged with collecting, analyzing and reporting information that can be used to improve the quality and restrain the cost of health care in the state. Today, PHC4 is a recognized national leader in public health care reporting. More than 840,000 public reports on patient treatment results are downloaded from the PHC4 website each year, and nearly 100 organizations and individuals annually utilize PHC4's special requests process to access and use data. PHC4 is governed by a 25-member board of directors, representing business, labor, consumers, health care providers, insurers and state government.

<sup>&</sup>lt;sup>2</sup> Per 10,000 residents.

Rankings are 1-67, where 1 is lowest (best) hospitalization rate. Higher rank might be dependent on population differences among counties (an older population, for example). Rates were not adjusted for population differences so that important effects of these patient characteristics were not masked by such adjustment. Note that 18.9% of Washington County residents were age 65 or older; statewide the percentage was 16.0%.

<sup>&</sup>lt;sup>4</sup> Chronic Obstructive Pulmonary Disease
